CUBE AdBlue® B.SMART

Much more than just a refueling system

With CUBE AdBlue® B.SMART, you have a complete solution for controlling your fleet's fluids. Thanks to the integrated B.SMART system, you can monitor both fuel and AdBlue® consumption from a single platform, giving you a clear, always up-to-date overview of operating costs.

CUBE AdBlue® B.SMART

The compact and versatile dispenser for AdBlue®

CUBE ADBLUE B.SMART is the new private-use dispenser for AdBlue®, designed to simplify and make safer the transfer, dispensing, and consumption control operations. Thanks to the integrated **Fuel Management System B.SMART**, CUBE ADBLUE allows you to monitor and manage dispensing easily and effectively, offering complete control of activities directly from the management system. The modern and compact design ensures practicality and reliability in every operational context.

The unit is equipped with Suzzarablue a self-priming electric diaphragm pump with a flow rate of 30 l/min, ideal for quickly meeting any

refueling need. The SB325_X automatic nozzle, patented and equipped with a break-away system, ensures maximum safety and precision during dispensing, while the 3D filter specific for AdBlue® guarantees a product always free from impurities.

The 3/4" delivery hose, 6 meters long, offers high operational flexibility, making all refueling operations easier. CUBE ADBLUE B.SMART is also equipped with a microswitch for automatic pump shut-off when the nozzle is repositioned, helping to optimize the safety and reliability of the system.
