

E200

The **E200** is a **self-priming rotary vane positive displacement pump for diesel transfer** both from tanks and for portable applications.

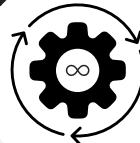

High flow rate in a compact design

**Robust,
compact and
reliable design**

**Integrated
bypass valve**

**Tested for
continuous
operation**

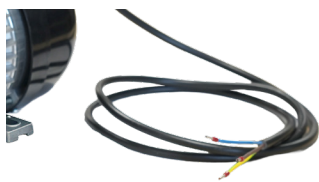

**200
LPM**

High flow rate

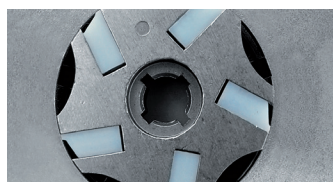

FEATURES

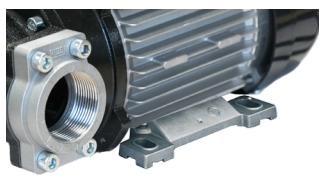

On/OFF selector

Power cable

Rotary Vanes

Removable feet

ENGINE

The **E200 pump** is equipped with a **self-ventilated asynchronous induction electric motor**.

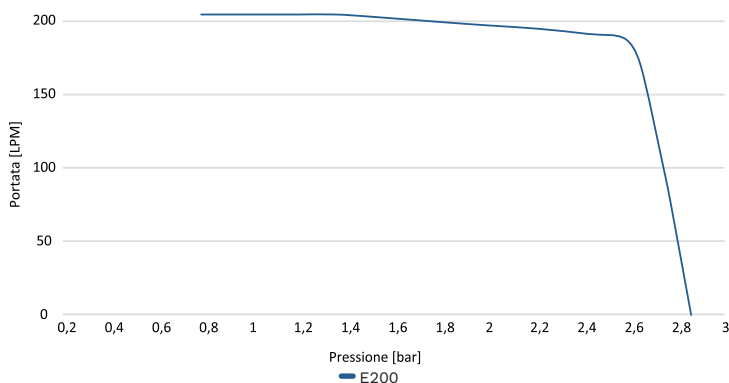

The compact cast iron structure with anti-corrosion coating, sintered steel impeller and technopolymer vanes ensure **reliability and long-lasting performance over time**.

**PROTECTION
IP55**

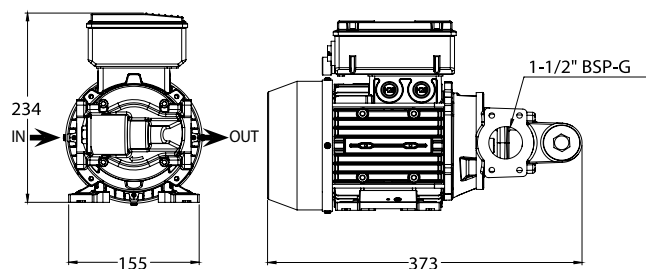

**PROTECTION
THERMAL**

PERFORMANCE
